Your score: **84 / 100**

QUESTIONS

LEVEL 2 — MEDIUM

Q1

1DArray

Q2

structure

Q3

string

Q4

2DArray

4 / 4 saved

Level 2 — Medium subarrays (M) — 1DArray

Write a program to find all subarrays where the product of elements is less than K.

Sample Input:

Enter number of elements: 4

Enter elements: 10 5 2 6

Enter value of K: 100

Sample Output:

Subarrays with product less than 100: [10], [5], [2], [6], [10, 5], [5, 2], [2, 6], [5, 2, 6]

Your Code

```
1 #include <stdio.h>
2 int main() {
3     int n;
4     long long k;
5     long long a[1000];
6     if (scanf("%d", &n) != 1) return 0;
7     for (int i = 0; i < n; i++) {
8         scanf("%lld", &a[i]);
9     }
10    scanf("%lld", &k);
11    printf("Subarrays with product less than K: ");
12    int firstPrinted = 1;
13    for (int i = 0; i < n; i++) {
```

```
14 long long prod = 1;
15 for (int j = i; j < n; j++) {
16     prod *= a[j];
17     if (prod < k) {
18         if (!firstPrinted) printf(", ");
19         firstPrinted = 0;
20         printf("[");
21         for (int x = i; x <= j; x++) {
22             printf("%lld", a[x]);
23             if (x < j) printf(", ");
24         }
25         printf("]");
26     }
27     if (prod >= k) break;
28 }
29
30 printf("\n");
31 return 0;
32 }
```

Program Input (stdin)

Enter input if required...

Output

```
Subarrays with product less than 100:
[10], [10, 5], [5], [5, 2], [5, 2, 6],
[2], [2, 6], [6]
```
